

# IMPLAYmaker

## CERTIFICATION COURSE TECH TOYS IN PRE-SCHOOL CLASSROOMS

Technology broadens the range of play possibilities and exposes children with meaningful learning experiences. Thus, early childhood practitioners play an essential role in integrating technology into their pre-school classroom to enrich learning for their children. Tech toys such as Bee-Bot, Circuit Stickers, KIBO and LittleBits provide opportunities for children to explore, experiment, collaborate with others and grow in their problem solving and logical thinking abilities.

This Certification Course will provide early childhood practitioners with hands-on experience using the Tech Toys. Practitioners will explore creative ways to engage with them and gain confidence in using them as a teaching and learning tool with the children.

The 17-hour workshop is designed for early childhood practitioners:

- ✳ To explore the creative and effective use of Tech Toys
- ✳ To understand the impact of technology on the child's development and learning
- ✳ To share experiences as a community of practitioners
- ✳ To engage children with diverse needs

### Workshop Fee

Full Fee: \$425.00 + \$29.75 GST  
SSG 90%: \$42.50 + \$29.75 GST (SME)  
SSG 50%: \$212.50 + \$29.75 (Non-SME)
